McPherson, Kansas
Permit No. 20

WE ARE THE LARGEST GROWERS OF HARDY ORNAMENTAL PLANTS IN THE MIDDLE WEST

Twenty-one acres of our plant is devoted exclusively to the propagation of perennial plants and evergreens from seed, divisions and cuttings; and we are growing these plants in such large quantities and with such modern equipment that we have been able to reduce production cost tremendously.

SUPERIOR QUALITY

Please do not imagine that we are making the low prices which we quote on ornamental plants, because of inferior stock. On the contrary, we believe we are growing the best plants that it is possible to purchase at any price. We do believe, however, that it is better business on our part, to sell at prices that allow us a fair margin, and thus give to our customers the savings that result, because of our efficient methods of production and distribution, rather than take the exorbitant profits that we would secure if we followed the price schedule of the majority of other nurseries. We offer nothing in this list that we ourselves have not thoroughly tested under the average garden conditions of the Middle West.

FLOWER GARDENS OF THE MIDDLE WEST

By

PAUL VINCENT BAKER, Landscape Architect

Public opinion to the contrary, I know that Flower Gardens of the Middle West given the same care, can be as colorful, as distinctive, as joy inspiring, as any of the gardens of the Western Coast or of the East. True our materials must be different from either, but from the list of plants that will successfully withstand the dry burning summer winds of the prairie country, and the trying alternate freezes and thaws of our open winters, we may weave a tapestry of such charm as will catch and thrill the eye of any garden lover.

I hold it to be an axiom that the average person feels the lure of color and flower, more keenly in the Spring than at any other season. No matter how our interest may wane in the hot, dry, months of summer—each spring brings a fresh interest in growing plants, and we feel a new fine thrill in the opening of a gorgeous blossom. Therefore, plant perennials and Holland Bulbs, and use them generously, for only these will give us that color symphony of early Spring.

If a perennial has only a short period of bloom, usually all the more reason to use it, for almost without an exception, such plants seem to condense all of the energy of a whole year of growth, in the production of a few magnificent flowers, that in

color, form, and delicacy of petalage, give us a picture so charming that it lingers throughout the season as a delightful memory. The finer Peonies, Iris, and Oriental Poppies are such plants and without exception should dominate our Spring gardens.

I have always felt, that the greatest bar to the development of really beautiful home grounds and gardens in this section, was the lack of a nursery that would grow only the ornamental plants adapted to mid-western gardens. The splendid nurseries of the East, with their encyclopedic catalogs, bewilder us with the wealth of flora they list; and the failures we have in attempting to grow plants, fine in themselves, but unsuited to our section, result not only in the loss of time and money, but what is more vital, in the dulling of the fine edge of our garden enthusiasm, and in the convincing of some of us that beautiful gardens here are impossible.

I believe that the nursery "Prairie Gardens" will fill the need for such an institution. I have carefully checked the list of plants they offer and find nothing therein, that would not grow successfully here, providing the requirements of soil and exposure are met, and the plants receive proper care.

WE OFFER A FEW "GET-ACQUAINTED" SPECIAL COLLECTIONS FOR HOME-GROUNDS AND FLOWER GARDENS

THESE PRICES WILL CONVINCE YOU THAT YOU CAN AFFORD TO PLANT THIS SPRING

Iris If you are only familiar with the old-fashioned "Flags" you have a wonderful surprise in store for you. The newer named sorts are revelations in the possibilities for beauty. We are growing more than 300 different kinds, the largest commercial collection in Kansas. All of them are perfectly hardy. The best Garden Flower for the Middle West. JUST TO GET ACQUAINTED—15 Iris—all different and all correctly labeled for \$1.50. Ask for Special Offer A No. 1.

Dianthus Everybody knows and loves the old-fashioned Sweet Williams and Clove Pinks of grandmothers' garden. We offer a very choice collection of these and hardy Carnations. Fifteen plants that will bloom this summer. JUST TO GET ACQUAINTED—OFFER A No. 2 for \$1.00.

Hardy Flowering Plants Do you like surprises. Here's a good one—15 hardy garden flowers—Hollyhocks, Shasta, Daisies, Gaillardia, but let's not spoil the secret by telling too much. Just send a dollar. Ask for Special Offer A No. 3. We will do the rest. When you receive these—don't be selfish—tell your friends where you got them.

Roses Strong dormant, ever-blooming plants—2 years old—field grown lusty, vigorous, and ready to bloom for you all this coming summer. Six bushes—all different and labeled true to name for only \$3.00. If you don't believe

we can do it, send along a check and ask for Special Offer A No. 4, and we'll show you.

Rare Ornamental Trees This is without doubt the most remarkable offer that Prairie Gardens has ever been able to make.

Sophora Japonica—Chinese Pagoda Tree

A rare Chinese importation and one of the finest of flowering trees, elegant in foliage, and in September, covered with clusters of white bloom. Its long pinnate leaves retain their deep green color until Autumn. A strong, rapid grower, absolutely hardy and perfectly adapted to the Middle West.

Pistacia Chinensis Pistacia Tree, another rare introduction from China of exceptional merit. Large pinnate leaves turning brilliant scarlet and orange in the autumn. We consider this one of the finest ornamental trees for the Middle West that has been introduced in years.

We offer as long as our very limited supply lasts, one each of the above two trees each, 15 to 24 inches high, delivered prepaid for the very exceptional price of \$1.00 for the two trees. Do not miss this remarkable offer. Ask for Offer A No. 5.

Everything Else We have everything for the Home-Grounds and Flower Garden. Shrubs, Roses, Evergreen Trees, Perennials, Bulbs, Vines, Shade Trees, Ornamental Grasses, Aquatic Plants for the Water Garden—these are only a few of the departments in which we hold complete stocks. Write and ask for a complete bargain list of ornamental plants. But order one or all of the above Special Collections, right now, before we lose our nerve and raise the prices.

Wonderful Introductory Offer — Order Now! Save Money!

APPLES

With the proper selection of varieties, and intelligent cultivation and care there is no reason why the orchardist, who makes a specialty of apples should not have a business yielding him larger returns for the money and labor invested than almost any other horticultural industry. Plant 40 feet each way and inter-plant with fillers. We recommend use of cherry, plum or peach for inter-planting in the home orchard, as these come into bearing early and may be removed at the end of 12 to 15 years. We recommend the planting of 1-year-old trees which are not only less expensive to buy and plant, but we honestly believe will give far better results than 2-year-olds. Order early as stock of 1-year trees is very limited this season.

Summer Apple Varieties

Duchess of Oldenburg. Medium to large; striped, mostly red; best summer cooking apple; good yield; hardy, early.
Early Harvest. Medium size; round; straw color; hardy and prolific; tender, sub-acid and fine.
Yellow Transparent. Skin is clear white, changing to a pale yellow when ripe; flesh white, tender.
Liveland Raspberry. Fruit good size, clear waxen, white striped and marbled crimson. Flesh snow white often tinged with pink next the skin. A popular summer variety. Blooms late, is blight proof, bears early. Ripens in July.

Fall Apples

Grimes Golden. Medium to large, slightly conical, skin yellowish white, mild, sub-acid, agreeably good to best of flavor. Tree a good grower, annual bearer. No orchard is complete without some Grimes Golden, no better eating apple.
Maiden Blush. Large, flat, pale yellow, beautiful blush, mild, sub-acid, valuable market, variety. One of the best cooking apples. September.

Crab Apples

Prices Same as for Standard Apples
Hyslop. Large, roundish-ovate; dark red with blue bloom; flesh yellowish.

Winter Apples

Gano. Large, even in size, bright red without stripes or splashes. Prolific bearer and a good keeper. Tree very vigorous, healthy, and hardy.

Prairie Gardens' Special Home Orchard Apple Tree Collection Offer No. 1 1 each of the Summer and Crab Apples and 2 each of the late Fall and Winter Apples listed above—20 trees in all—2-3 ft. high. **Only \$3.98**

CHERRIES

Cherry trees are naturally hardy—grow on almost any well drained soil—bear early, and are more resistant to frosts than any other fruit. The fruit is so much in demand that crops sell readily on the tree. We strongly advise liberal plantings of cherry of the SOUR varieties for the Middle West. Plant one-year trees, 16 to 20 ft. each way.

Early Richmond. (May Cherry.) The common red cherry, of good size and quality. Very hardy, one of the best cherries for Nebraska, Kansas, Oklahoma, and Texas. Ripens in June.
Montmorency. Large red, rich, and acid. Very hardy and productive. Very much like the Early Richmond, ripens 10 days to two weeks later than Richmond. One of the best cherries for western Nebraska, Kansas, and Oklahoma.

Prairie Gardens' Special Home Orchard Cherry Tree Collection—Offer No. 2 2 each of English Morello and Wragg and 4 each of Early Richmond and Montmorency—12 trees strong, 2-3 feet **Only \$3.98**

"Full of Vitality" Selected Stock

We want Your Business and we are making you these Special Prices to induce you to compare our stock with that of other growers. We guarantee that you will be entirely satisfied with the trees, and plants you order from us. Without question, we will refund your money if you are not pleased!

This is that rare combination -- Low Prices and Splendid Quality

PLANT AN ORCHARD

Every year fruit is rapidly increasing in value, as not for years has the planting of orchards kept pace with the increasing population and demand. Providing your soil is adapted to tree growing—a few acres will produce annually a far greater income than is now produced on the average quarter-section. AT LEAST PLANT SUFFICIENT FRUIT TREES TO SUPPLY YOUR HOME NEEDS!

SELECTION OF VARIETIES

We believe it would be impossible to select a general list of fruit trees that would include better varieties for the Middle West than those we list. We have eliminated every sort that has not been thoroughly tested and proven satisfactory in orchards all through this section. We have also omitted the kinds that while bearing splendidly in some sections, yield only fair crops in others. Especially in the Middle West you may choose at random from this list and not go wrong in any selection you may make.

PLEASE NOTICE!

That we do NOT for the sake of securing sales, list any new varieties or novelties, or any old sorts under special names. We prefer to let the other nurserymen's customers gamble money and years of waiting, growing the annual crops of novelties that in most cases are surpassed by varieties now available. Our customers know when they buy our trees that they are making a sane conservative investment that given proper attention will return annual dividends, in fruit of proven worth and merit.

4 to 5 feet.....	.40	4.50	30.00

PEACHES

Every home orchard should contain a liberal planting of peaches, especially of the fine flavored sorts that are too tender to stand shipping. Unexcelled as a profit maker either for local sale or shipping, even the commercial kinds such as Elberta are doubly delicious, when they can be allowed to fully ripen on the tree for home consumption. Peaches begin to bear the second or third year and give very quick returns. Most of the peach orchards in the Middle West have died out of old age and there is now a great scarcity. Plant 18 ft. to 20 ft. apart each way. For the Middle West, we recommend heading the trees quite low, as this keeps the branches closer to the ground, and the tree will withstand the summer winds when branches are heavy with fruit, to much better advantage. Pruning $\frac{1}{2}$ to $\frac{3}{4}$ of the new growth each year will increase the quality and yield of fruit. There is a definite advantage in planting the smaller size trees, if you desire low-heading.

Belle of Georgia. A very large, white fleshed peach with a red cheek; firm, juicy and of excellent flavor. Productive. A fine shipper and does well in the North as well as in the South. Rapid grower. August.

Champion. An exceptionally high quality, hardy, white peach. Freestone. Large size, white fleshed, excellent quality. It is known as one of the best shippers. Tree is almost perfect. Fine peach for home use as well as for the local markets. Very hardy fruit bud, often bearing a full crop when other varieties fail. August.

Crawford's Early. This magnificent large yellow freestone peach; is of good quality, and a beauty which makes it one of the most popular orchard varieties. August.

Crawford's Late. This peach is similar to the Crawford's Early, but ripens two or three weeks later.

Mayflower. Bright red checked. Carries to market in fine shape and sells well, as it is the only early peach that is well colored. Inclined to overbear, it should always be thinned. July.

A. B. Hale. Freestone. Fruit larger than the Elberta. Rich golden yellow, covered with carmine. Flesh deep yellow, firm and fine grained. Flavor excellent. Tree fully as hardy as the Elberta.

Heath Cling. Clingstone. Large round fruit with juicy flesh of fine quality. The best peach for pickles. Ripe September or October.

Belle of Georgia. Freestone. Large creamy yellow, with crimson cheeks. Flesh firm, flavor excellent, prolific bearer. July and August.

Borchester. A yellow freestone variety having the exceptional merits of being early (ripening about August 10), extraordinary sweetness and early bearing. Fruit is large, yellow, sweet, juicy and of delicious flavor; keeping and shipping well; skin pretty blushed. Tree is strong growing and hardy, an annual and prolific cropper.

Chinese Cling. Large, white, shaded red, fine quality. A favorite in the South. August.

Prairie Gardens' Special Home Orchard Peach Tree Collection Offer No. 3 2 each of the above Peach Trees—20 trees in all—All carefully selected stock, with splendid root system and sturdy top—2-3 feet high **Only \$3.98**

DELICIOUS PEARS

First Class	Each	10	100
3 to 4 feet.....	.45	\$4.00	\$35.00
4 to 5 feet.....	.60	5.50	50.00
5 to 7 feet.....	.75	7.00	65.00

We find that pears grow splendidly on any good soil, but in the Middle West, the trees in some varieties are inclined to blight. Seemingly they do better if allowed to grow slowly and for this reason we advise planting where they need not be cultivated after the first two years. They are especially desirable for planting in the lawn as shade trees or in windbreak rows around the farm yard. On these conditions they live and bear splendidly.

Sieckel. (Sugar Pear.) Small in size but of highest quality and flavor. Trees grow slowly but they are healthy, hardy and very productive. They are more susceptible to blight than the Duchess and should be sprayed during the summer. Ripens in October.

Kieffer. A profitable market variety. Very large, of fine appearance. Good for canning, of fair quality. Does well in Kansas, Oklahoma and Texas. Ripens in October.

Clapp's Favorite. Fruit large, pale yellow, flesh fine grained, juicy melting and sweet. One of the best early pears for the Middle West. Tree vigorous, upright, spreading. Fruit ripens in August and September.

Duchess. Fruit very large, quality fine and juicy. Keeps well into winter, ripens in October. Tree almost blightproof. Ripens in October.

Prairie Gardens' Special Home Orchard Pear Tree Collection—Offer No. 4 1 each of Sieckel, Clapp's Favorite, and Duchess, and 2 Kieffer, 10 trees in all strong trees—3 to 4 ft. high **Only \$3.98**

We Guarantee Arrival in Good Condition

This entire collection of 420 splendid fruit trees and plants, all strong, well grown and carefully selected.

Only \$31.98

Carefully packed and safe delivery guaranteed!

TERMS

Cash with order. Remit by money order, draft or check. Do not send currency except by registered mail.

SHIPPING INSTRUCTIONS

Be explicit and thus save time and errors. We always ship by express unless otherwise instructed. Please use our order blank whenever possible.

PRICES

All prices are f. o. b., McPherson, Kansas, the transportation charges to be paid by customer. All prices include cost of packing. We cannot accept orders for less than \$1.00.

GUARANTY

Our firm is incorporated under the Laws of Kansas and is absolutely responsible. We refer you to any bank in McPherson as to our financial rating. We guarantee all trees and plants to be first class stock of the sizes quoted and to reach you in good growing condition. We will refund your money if any plant proves untrue to name, provided that in case of errors, we are in nowise liable for any sum, exceeding the original purchase price if the stock is proven untrue.

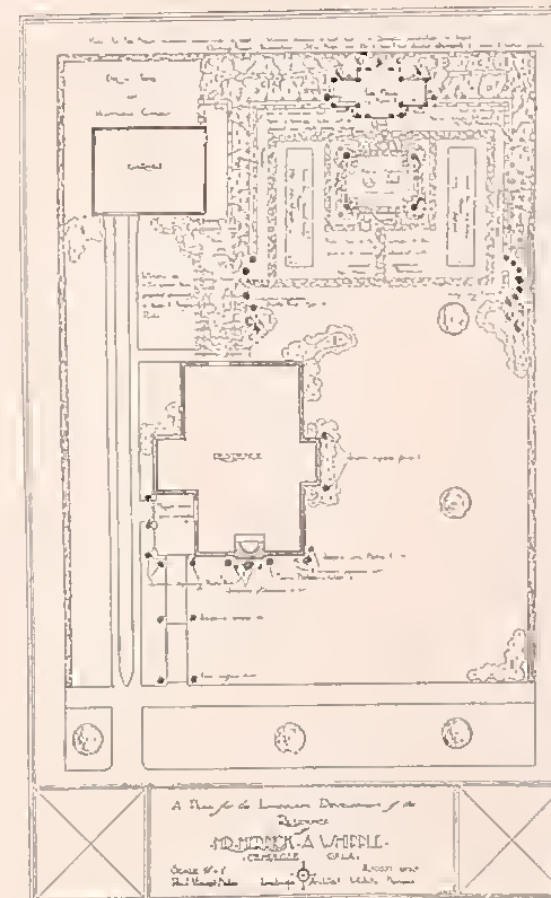

THE PLANNING AND PLANTING OF HOME GROUNDS

Business of today is established on the foundation of Service, and we are constantly adding additional friendly customers because we are trying in every way to serve our customers' interest.

We believe that one of the finest things that we have done is to give to you the advantage of carefully detailed landscape plans for your individual home grounds. These are in no sense stock plans, but are especially designed by Paul Vincent Baker, Landscape Architect to solve your personal problem. The plan shown at the right is a typical one as developed for our customers.

This service is actually free; for the small fee that we charge to keep out mere curiosity inquirers, is refunded on the first order for planting stock. If interested, write for full details and application blank. Remember that no plot is so small that the proper planting will not add to its dignity and beauty. Few people realize how much may be added to the home enjoyment, even on a fifty foot lot by a judicious employment of its possibilities. The flower gardens of the prairie country can be as colorful, as distinctive, as joy-inspiring as those of the eastern and western coasts.

No community can better advertise its progressiveness, than by fostering the further landscape development of their golf courses and public parks and school grounds. We invite consultation, both with regards new project and the improvement and renovation of those already established.

PLUMS

A splendid fruit for quick returns, as they are early bearers, and the market is never glutted. They are the best of all trees for planting in the poultry runs and are equally good for orchard planting. The kinds we list are such prolific bearers that the fruit should be thinned.

Lombard. Medium sized, oval, violet-red, flesh yellow, juicy, pleasant. A great bearer and particularly well adapted to light soils. Trees vigorous and hardy, succeeding where many other varieties fail. One of the best plums for Kansas and Nebraska. Ripens in August.

Burbank. When thinned the fruit is large, nearly round, cherry-red. Flesh deep yellow, firm and sweet. Tree vigorous and spreading, bears well. Ripens in August.

Abundance. Prolific early bearer. Dark red. Flesh yellow. Skin thin. Very juicy, tender, and melting. Midseason.

Red June. Medium to large, deep red with beautiful bloom. Flesh lemon-yellow, firm and delightful quality. Ripens in August.

Size	Each	Per 10	Per 100
2 - 3 ft. high.....	\$.35	\$3.00	\$25.00
3 - 4 ft. high.....	.45	4.00	35.00
4 - 5 ft. high.....	.60	5.50	45.00
5 - 7 ft. high.....	.75	7.00	60.00

The Hansen Varieties

These plums were all introduced by Prof. Hansen of the South Dakota Experiment Station. All are hybrids of the native plums of South Dakota and are therefore, perfectly hardy. All come into bearing the next year after being transplanted and they bear profusely.

Sapa. Fruit dark purple, rich, and fine. The skin is very tender and practically disappears when cooked. Excellent for preserves and jelly.

Hanska. Fruit large, bright red with heavy blue bloom; of excellent quality. Tree of upright habit.

Waneta. Large, 2 inches in diameter, good red color, of delicious flavor, flesh of fine quality.

Prairie Gardens' Special Home Orchard Plum Tree Collection
Offer No. 5—2 each of all of the above varieties, 14 trees in all. Strong stock, 3 ft. and up high **Only \$3.98**

APRICOTS

This is one of the most ornamental of all fruit trees and should be more largely planted on home grounds. Liable to frost damage in some sections, but certainly one of the best fruits, it is possible to grow.

Moorpark. Yellow, with red cheek, juicy, sweet and rich, freestone, very productive.

Royal. Large, yellow, juicy, rich and delicious; a very fine variety.

Alexander. Russian variety, extremely hardy and more frost resistant.

Superb. A hardy seedling from Kansas. The best flavored, most productive hardy apricot yet produced. (Medium size, light salmon color.)

Budd. Popular sort, very productive.

Size	Each	Per 10
2 - 3 ft. high.....	\$.45	\$4.00
3 - 4 ft. high.....	.60	5.50

Prairie Gardens' Special Home Orchard Apricot Tree Collection—Offer No. 6—2 each of the above 5 varieties, 10 trees in all. **Only \$3.98**
Strong stock, 2½ and up high.

Mulberries

Valuable for shade and ornamental purposes as well as for the fruit; also for hedge and posts, being rapid in growth.

New American. Fruit large, jet black, of the finest quality. Tree vigorous; a good bearer and highly ornamental for the lawn.

1st Class, 3 to 4 ft...\$0.75 each

Russian. Very hardy, vigorous grower; for hedges, fences and waste food supply in poultry yards.

1st Class, 3-4, each.....\$.25
1-yr. Seeding, per 100....2.00

Quinces

Each	10
1st Class, 4 to 5...\$1.00	\$9.50
1st Class, 3 to 4... .90	8.50

Champion. Flesh cooks tender like an apple without hard spots. Flavor delicate; bears abundantly.

Mecches Prolific. Very large, bright yellow. Quality good. Of great beauty and delightfully fragrant. Bears early.

Orange. An old standard variety. Large, roundish, somewhat irregular with short neck at base. Fine golden yellow flesh, excellent flavor. October.

Rhubarb

A deep rich soil is indispensable to insure large, heavy stalks. Plant in rows 4 feet apart and 3 feet apart in the row. Set so that the crowns are about 1 inch below the surface. Top dress in the fall with stable manure and work well into soil in early Spring.

1-year, 15c each, \$1.50 per doz. \$8.00 per 100.

2-year 25c each, \$2.50 per doz.

Linnaeus. Large, early tender; fine, old reliable pie kind. Stalks are a decided pink color and delicious for canning, cooking or pies. A strong grower.

Delicious Strawberries

	100	1000
Aroma.....	(Per) \$1.00	\$8.00
Senator Dunlap.....	(Per) 1.00	7.00
Gandy.....	(Per) 2.00	10.00

Everbearing

Progressive.....	(Per) \$2.50	\$12.00
Champion.....	(Per) 2.00	18.00

Aroma. Large berries, roundish, conical; rare-misshaped. Excellent quality. Late.

Gandy. Late, (Perfect.) Considered the best long keeping and the best shipper in the market. On heavy rich soil the plant is a marvel of vigor and productiveness.

Senator Dunlap. Medium Early, (Perfect.) This is the most popular of all strawberries in this section of the United States. It produces immense crops of beautiful dark red berries, of medium size and excellent quality.

Champion. A new berry originated last year which shows very promising yield; fruit large, regular.

Progressive. Fall bearing; berries are medium size; good quality, smooth, of good color.

Grapes

Prices for No. 1—1 Year

	Each	10	100
Concord...\$.15	\$1.00	\$7.00
All others...	.25	2.00	16.00

No part of the fruit garden yields a richer harvest than the vineyard. Bear well even on poor soil. Form the habit of making your garden fences produce income.

Agawam. Berries quite large with thick skin. Red.

Concord. One of the best known varieties. Black.

Campbell's Early. Rich and sweet. Ripens early. Black.

Moore's Early. Clusters medium size; berries large. Black.

Diamond. Sweet flesh and few seeds. One of best. White.

Niagara. Sweet and large. Vigorous and productive. White.

Delaware. Table variety. Bunches small, compacted. Red.

Worden. Resembles Concord, but is sweeter, larger in bunch and berry, and a week to ten days earlier. Black.

Prairie Garden's Special Grape Vine Collection for the Home Garden

3 each of all of the above kinds

Mersereau, 1st class.....	1.00	5.00
Snyder, 1st class.....	1.00	5.00

Blowers. Large berry of finest flavor and jet black color.

Eldorado. One of the leading and most profitable varieties. Extremely hardy and a very strong grower. Good canner.

Mersereau. Early producer and by far the most profitable variety. Hardy enough to stand our winters without protection.

Snyder. Medium size, sweet, melting, juicy, with no hard core.

Early Harvest. One of the best early varieties. Hardy.

Gooseberries

First class 2-year-old plants: Each, 25c; \$2.50 dozen.

Downing. Large, pale green, of splendid quality for both cooking and table use. Skin smooth.

Houghton. Small to medium, roundish, oval, pale red, sweet, tender, very good. Plant is spreading and productive.

Asparagus

Conover. A standard variety of large size, tender and excellent quality. 50 for \$1.00; 100 for \$1.75.

Palmetto. A very early variety; even regular size, of excellent quality. 50 for \$1.00; 100 for \$1.75.

Plum Farmer, Black.....	1.00	5.00	35.00
St. Regis, Everbearing red	1.25	6.00	40.00

Cuthbert. A strong growing, hardy variety. Berries large and firm, sweet, rich, and luscious. The best of late red varieties.

Cumberland. Mammoth mid-season blackcap that loads its stout, stocky canes.

Gregg. Its large, snowy berries are produced in great abundance; are very firm; an old standby. For years the leading blackcap. Late market variety.

Kansas. Strong grower; fruit jet black; splendid yielder.

Plum Farmer. Fine grower; fruit jet black, as large or larger than other blackcaps.

St. Regis. Everbearing. Red raspberries for four months is what you get when you plant the St. Regis. The berries are of the highest grade and quality, brilliant crimson in color, and firm in flesh. The vine is absolutely hardy and a vigorous grower. Fruit ripens from June to October.
